

Description

These data files are a translation of a subset of the data published in the denominational yearbooks of the Seventh-day Adventist denomination. The focus is on the named positions held by denominational members. The goal in constructing this data is to examine centralization of power within the denomination, regional characteristics of denominational leadership, and insights into the gendered distribution of power over the development of the denomination.

Headings

conference

Used to denote the highest level organizational body the data is associated with. Prior to the formation of regional conferences, the information was organized by state. For these, the regional conference with which the data will eventually be associated is noted.

- North American
- Atlantic Union | Columbia Union | Columbia Union (not formed)
 - Refers to the mid-Atlantic seaboard and Appalachian regions.
 - Includes:

As New York and New Jersey appear to carry most of the weight of the region in these periods, data on the Atlantic Region are not included so as to avoid over-representation. In 1905, The Cumberland conference was included in the Southern Union and was composed primarily of Tennessee. As such, it is included for that year.
